Approved by the World Agricultural Outlook Board

WASDE-157

October 25, 1983

Reported U.S. Corn, Sorghum Stocks Below Estimates; No Change in Soybean, Cotton, Livestock Forecasts

Reported stocks of corn and sorghum on October 1 were below estimates contained in the October 13 World Agricultural Supply and Demand Estimates report. These lower stocks indicate that feed and residual use of corn and sorghum for June-September 1983 was much higher than expected. Wheat feeding also was above expectations, reflecting large wheat supplies and competitive wheat prices relative to feed grains. There was a substantial upward revision in the 1982/83 U.S. ending stocks figure for rice.

Estimates are unchanged from the October 13 World Agricultural Supply and Demand Estimates report for soybeans and cotton. Livestock and poultry forecasts are unchanged, although in some instances third quarter and 1983 totals and averages reflect an additional month's data.

Feed Use Estimates Rise For Corn, Sorghum, Barley

The 1982/83 (October-September) U.S. corn carryover, placed yesterday at 80 million tons (3,140 million bushels), was 5 million tons below earlier estimates, but still the largest ever. The stocks level suggests that from June through September, more than 26 million tons (1,043 million bushels) of corn were fed--38 percent more than the same period a year ago and the most since 1972. Poor grazing conditions in late summer due to the drought probably contributed to the increased feed use for the period. As a result, the estimate of 1982/83 corn feed use and residual has been raised 8 million tons to a record 122 million (4,794 million bushels), 15 percent above 1981/82.

Sorghum ending stocks of 10 million tons (399 million bushels) also were lower than anticipated, again suggesting unusually heavy feeding during June-September. The 1982/83 sorghum feed use estimate has been raised to 13 million tons (519 million bushels), 10 percent above the previous estimate, 20 percent above the previous year's feed use, and the largest since 1978/79.

Barley stocks of 11 million tons (525 million bushels) suggest June-September feed use almost two-thirds higher than the same period a year ago. Consequently, the projection for 1983/84 (June-May) feed use has been raised 7 percent to 6 million tons (290 million bushels), a fifth above the 1982/83 level and the highest on record.

The tighter feed grain supply suggests adjustments in the forecast corn and sorghum utilization for the marketing year that began this month. Feed use of corn in 1983/84 is now forecast at 100 million tons (3,950 million bushels), 1 percent below the previous estimate and 18 percent below last year's usage.

The corn export projection was adjusted down 3 percent, but at 48 million tons (1,875 bushels) remains slightly higher than 1982/83 shipments. The 1983/84 corn carryover is now put at 27 million tons (625 million bushels), one-fourth lower than the previous estimate and 80 percent below the record 1982/83 carryover. The projected stocks/use ratio, at 9 percent, compares with the 12 percent forecast previously and approaches the 1973-75 average of 8 percent.

Forecast 1983/84 corn prices remain unchanged at \$3.40-\$3.80, as prices during the opening weeks of the current quarter were not as strong as had been anticipated.

The sorghum feed use forecast for 1983/84 has been lifted to 12 million tons (470 million bushels), 4 percent above the previous estimate but 9 percent below 1982/83. Sorghum stocks now are expected to decline to 4 million tons (151 million bushels), one-fourth of the 1982/83 carryover.

Wheat Feed Use Forecast
Highest In Forty Years

The tight supplies and relatively high prices for corn and the feed grains should push feed use of wheat to levels unprecedented since World War II. Wheat feeding during June-September was 46 percent above the year before and possibly the highest ever for that period. The wheat feed use forecast for 1983/84 has been raised accordingly to 10 million tons (350 million bushels), two-thirds higher than last year. Some drawdown in burdensome wheat stock levels now can be expected although at 40 million tons (1,474 million bushels) they will remain quite large.

1982/83 Rice Stocks
Larger Than Thought

An error in California's reported rice stocks on August 1 caused a revision in the 1982/83 U.S. carryover to 71.5 million cwt from the 66.6 million previously reported. With total disappearance for 1983/84 still projected at 141 million cwt, ending stocks now are forecast at 34 million--5 million above the previous estimate, but still less than half last season's carryover.

1/ Marketing year beginning September 1 for soybeans; October 1 for soybean oil and meal. 2/ The "probable variation" reflects the root mean square error and/or standard error of estimate from trend and judgment. Chances are about 2 out of 3 that the outcome will fall within the implied ranges. 3/ Simple average of crude soybean oil, Decatur, dollars per metric ton. 4/ Simple average of 44 percent protein, Decatur, dollars per metric ton.

1/ All data on October-September year. 2/ Includes sorghum, barley, and oats. 3/ Including rye. 4/ Includes cottonseed meal, peanut, linseed and sunflower. 5/ Wheat average farm price; corn weighted average farm price; soybean meal average price, Decatur, Ill.; choice steers, 900-1,100 pounds, Omaha; barrows and gilts, 7 markets; broilers, wholesale, 9-city average; and average price received by farmers for all milk. 6/ The 9-city price has been discontinued and replaced by a 12-city price. Comparable data are not available for computing an average in 1982/83.

U.S. quarterly animal product production and prices

1/ Projection. 2/ Commercial production for red meats; federally inspected production for poultry meats. 3/ Includes beef, pork, veal, lamb and mutton. 4/ Includes broilers, turkeys, and mature chicken. 5/ Does not reflect any deductions from producers authorized in legislation. 6/ The 9-city price has been discontinued; starting with second quarter 1983 the broiler price is the new 12-city average. 7/ Quarterly data not comparable to compute average.

1/ Marketing year beginning Aug. 1. 2/ The "probable variation" reflects the root mean square error and/or standard error of estimate from trend and judgment. Chances are about 2 out of 3 that the outcome will fall within the implied ranges. 3/ Based on Bureau of the Census data. 4/ Includes imports. 5/ Difference between ending stocks based on Bureau of Census data and preceding season's supply less distribution. 6/ Less than 50,000 bales. 7/ Season average farm price, domestic measure, cents per pound; metric measure, dollars per kilogram. 8/ Weighted average for the first eight months of the marketing season; not a projection for 1982/83. 9/ USDA is prohibited from publishing cotton price projections.

Note: Totals may not add due to rounding.

The World Agricultural Supply and Demand Estimates were approved by the Interagency Commodity Estimates Committees for:

FEED GRAINS: John C. Roney, Acting Chairman, WAOB; Lyle Sebranek, FAS; Orville I. Overboe, ASCS; Ralph Tapp, AMS; Sam Evans, ERS.

WHEAT: John C. Roney, Acting Chairman, WAOB; Lyle Sebranek, FAS; David Spalding, AMS; Randell Weber, ASCS; Sam Evans, ERS.

RICE: John C. Roney, Acting Chairman, WAOB; Tom Slayton, FAS; David Spalding, AMS; George Schaefer, ASCS; Sam Evans, ERS.

SOYBEANS, COTTONSEED AND OILS: Jim L. Matthews, Chairman, WAOB; Alan E. Holz, FAS; Sam Evans, ERS; David Spalding, AMS; Louise Lynch, ASCS.

DAIRY: James Nix, Chairman, WAOB; Jack Mills, FAS; Charles Shaw, ASCS; Robert R. Miller, AMS; Clifford Carman, ERS.

MEAT ANIMALS: James Nix, Chairman, WAOB, Jack Mills, FAS; Charles Shaw, ASCS; David Spalding, AMS; Ron Gustafson, ERS.

POULTRY: James Nix, Chairman, WAOB; Jack Mills, FAS; Charles Shaw, ASCS; Jack Ross, AMS; Allen Baker, ERS.

COTTON: Russell G. Barlowe, Chairman, WAOB; Gordon Lloyd, FAS; Carol Skelly, ASCS; Loyd Frazier, AMS; Sam Evans, ERS.

The World Agricultural Supply and Demand Estimates report draws on information from USDA's global network of agricultural attaches and counselors, commodity analysts, and country regional specialists.
